

Nest Match Plan Limits Decision

Plan limits and product direction.

Nest Match Plan Limits Decision - 2026-07-08

Decision

Do not limit normal messages after two users are connected.

The product should meter new contacts / new connections / contact unlocks, not normal conversation volume. Once two parties are connected, chat replies should be unlimited on Free, Premium and Pro.

Why

Nest Match is a marketplace. If chat messages are limited after a connection exists, the product feels broken and users avoid using it for real work. The healthy upgrade trigger is access to more new people, not rationing conversation after a useful contact has already been made.

Recommended Structure

Free

- Browse: yes.
- Existing chat replies: unlimited.
- New contacts per month:
 - service providers: 5;
 - hosts/operators: 3;
 - landlords/owners: 2;
 - agents/agencies: 3.

Pro

- Existing chat replies: unlimited.
- New contacts per month: 25.
- Better profile visibility.
- More saved searches / alerts.
- Can send attachments.
- Good for normal active users.

Premium

- Existing chat replies: unlimited.
- New contacts/connections: unlimited, with fair-use anti-spam protection.
- Priority visibility.
- Team/company profile.
- Advanced filters.
- Verified badge / trust layer.
- Best for agencies, bigger operators and serious service providers.

Product Copy

Use clear copy:

Messages are unlimited once connected. Plans only limit how many new people you can contact each month.

Free users should be able to actually test the product. Pro should support normal active users. Premium should be the highest tier for serious users who want broad market access.

Pricing Page Plan Section Copy

Add these lines inside the plan cards:

Free

- Messages: unlimited after connection.
- New contacts/month: limited by role.

Pro

- Messages: unlimited after connection.
- New contacts/month: 25.

Premium

- Messages: unlimited after connection.
- New contacts/connections: unlimited, with fair-use anti-spam protection.
