

Lux Oasis Advisory Social Media Project

Umbrella ecosystem positioning for ORL, Conviva, Nest Match and Advisory products.

Lux Oasis Advisory Social Media Project - 2026-08-01

Purpose: start a proper social-media workstream for Lux Oasis Advisory & Services LLC around the short-term-rental ecosystem Damiano is building.

Slack channel: `#social-media-` / `C08BZGP36CV` .

Kickoff handoff to Lin: Slack message `1785572953.634289` on 2026-08-01.

Channel correction from Damiano: follow this project in the CEO/business or Lux Oasis Advisory board, not only the generic social-media channel and not as a Lux Oasis Holiday Homes-only lane. Current blocker: the bot is not a member of `#lux-oasis-advisory-and-services-` / `C0AQWTVJUK1` , and Slack rejected the join attempt with `missing_scope` .

CEO Strategy repost completed:

- Advisory-specific board: `#lux-aosis-advisory-and-serivces` / `C0B1XHNEHGE` , message `1785573493.942979` .
 - Full kickoff: `#all-ceo-strategy-and-businesses` / `C0AMEUCGZL1` , message `1785573315.814249` .
 - Execution note: CEO Strategy `#social-media-` / `C0BMFEUN80L` , message `1785573316.344399` .
 - Positioning correction posted: Advisory board message `1785573620.151909` , CEO/business board message `1785573620.588769` , CEO Strategy social-media message `1785573621.035669` .
 - Website set handoff posted 2026-08-03: Lin/social-media execution message `1785766972.322779` in CEO Strategy `#social-media-` / `C0BMFEUN80L` ; Advisory team announcement `1785766972.773509` in `#lux-aosis-advisory-and-serivces` / `C0B1XHNEHGE` .

Company Positioning

Lux Oasis Advisory & Services LLC is the umbrella company for the Lux Oasis short-term-rental ecosystem.

Public positioning:

Lux Oasis Advisory & Services LLC builds practical tools, AI workflows and operating systems for short-term-rental operators, owners and service providers in Dubai.

Use this company for:

- Oasis Revenue Lab;
- Conviva;
- Nest Match;
- Control Tower / agent operating layer;
- Lux Oasis Renovation / Interiors;
- advisory, data, AI tools and marketplace infrastructure.

Do not confuse this with Lux Oasis Holiday Homes LLC, which is the holiday-home management and operating proof business.

Positioning correction from Damiano on 2026-08-01:

- Lux Oasis Advisory & Services LLC is the umbrella ecosystem for short-term-rental clients.
- When clients come in through Advisory, the business can offer Conviva, Oasis Revenue Lab and other operating products/services.
- Nest Match is a project on its own and sits above/cross-connects the ecosystem as the marketplace/network layer.
- Nest Match still belongs under the Lux Oasis Advisory & Services LLC umbrella.

Ecosystem Explanation

Oasis Revenue Lab

Revenue-management intelligence for short-term-rental operators.

Explain it as:

- PriceLabs review and revenue judgement;
- owner-ready reporting;
- pricing, occupancy and calendar action plans;
- a supervised revenue-management operating desk, not a generic dashboard.

Current CTA asset:

- Price Lab Expert Dashboard / ORL partner page:

<https://pricelabs-rmpartners.directoryup.com/pricelabs-rm-partners/lux-oasis-advisory-and-services-llc>

- Use the QR as a scan-to-message lead/contact CTA.
- Do not use it with guaranteed-revenue or automatic-profit language.

Conviva

Supervised guest-operations assistant for STR operators.

Explain it as:

- WhatsApp-native guest reply support;
- grounded in property-specific knowledge;
- human escalation when a question is risky, unclear or not in the knowledge base;
- built for operator control, not uncontrolled autonomous guest messaging.

Nest Match

Marketplace and coordination layer sitting above/cross-connecting the STR ecosystem.

Explain it as:

- a network for operators, service providers, owners, agents and property routes;
- a way to reduce fragmented WhatsApp/referral chaos;
- a future B2B coordination layer for inventory, services, operators and opportunities;
- its own standalone project, still under the Lux Oasis Advisory & Services LLC umbrella.

Lux Oasis Renovation / Interiors

STR-readiness and property-execution support.

Explain it as:

- apartment refresh planning;
- setup, handover and quality control;
- owner/operator readiness before a unit goes live;
- advisory and project coordination, not a vague contractor claim.

Control Tower / Agent Operating Layer

Internal operating-system proof.

Explain it carefully as:

- the way Damiano is testing founder-plus-agent operations;
- a system for turning scattered inputs into tasks, trackers and decisions;
- not a public SaaS promise until product scope is cleaner.

Libis / Name To Confirm

Damiano mentioned **Libis** . Do not create public copy for this until the product name and meaning are confirmed.

Current Public Website Set

Confirmed by Damiano and checked live on 2026-08-03:

- Lux Oasis Advisory hub: <https://luxoasisadvisory.com>
- Oasis Revenue Lab: <https://www.oasisrevenueelab.com>
- Conviva: <https://www.conviva.live>
- Lux Oasis Renovation: <https://www.luxoasisrenovations.com>

Website analysis:

- All four returned HTTP 200 and loaded in browser without main-viewport console errors.
 - Lux Oasis Advisory is the parent credibility site. Use it for company ecosystem, LinkedIn profile, partner context and "what Lux Oasis Advisory & Services LLC is" posts.
 - Oasis Revenue Lab is the clearest commercial offer for LinkedIn: daily revenue intelligence, pricing, PriceLabs, STR operator decision-making.
 - Conviva is the strongest immediate product story for social: WhatsApp guest communication, unit-level knowledge, Chatwoot/human handover and operational relief.
 - Lux Oasis Renovation is polished and premium, but social captions should make the offer explicit: Dubai STR renovation project management, not contracting, from scope/design to guest-ready handover.
 - The four pages should be presented as one Lux Oasis Advisory & Services LLC ecosystem, not four disconnected brands.
-

First Post Queue For Lin

Lin should prepare drafts first. No public post without review.

- Company introduction post
- What Lux Oasis Advisory & Services LLC is.

- Visual: simple ecosystem map with Lux Oasis Advisory in the centre and ORL, Conviva, Nest Match, Renovation and Control Tower around it.
- CTA: follow the company / message us if you operate or own STR assets in Dubai.
- Oasis Revenue Lab explainer
- Problem: operators have data, but not always clear revenue judgement.
- Solution: ORL turns pricing, occupancy, market and PMS data into clearer action.
- CTA: scan/message through the Price Lab Expert Dashboard QR.
- Conviva problem-solution post
- Problem: guest messaging breaks when AI guesses or staff cannot find property-specific answers.
- Solution: Conviva replies from known unit information and escalates when needed.
- CTA: ask for a demo / pilot conversation after review.
- Nest Match ecosystem post
- Problem: operators, owners, agents and service providers coordinate through scattered chats.
- Solution: Nest Match is the marketplace/network layer being built for cleaner STR coordination.
- CTA: follow the build / message if you are an operator or service provider.

First Company Introduction Draft

Lux Oasis Advisory & Services LLC is building an operating ecosystem for Dubai short-term rentals.

From revenue management through Oasis Revenue Lab, to guest operations with Conviva, to marketplace and service-provider coordination through Nest Match, the goal is simple: help operators, owners and partners make better decisions, reduce manual chaos and run stronger short-term-rental businesses.

This is being built from real operating pain inside the Lux Oasis ecosystem: pricing decisions, guest communication, property readiness, owner reporting, service-provider coordination and daily execution.

We are starting with practical tools and services, then turning the strongest workflows into repeatable products.

Content Rules

- Draft first, publish only after Damiano review.
- No guaranteed revenue, guaranteed occupancy or automatic-profit claims.
- No private guest, owner, operator or financial data.
- Do not claim product features are live unless verified.
- Use practical operator problems and real workflow lessons.
- Keep copy credible, founder-led and business-focused.
- For LinkedIn, write for owners, operators, partners, revenue managers, proptech people and serious service providers.
- For Instagram/stories, use simpler visuals and scan-to-message CTAs, but still avoid revenue claims.

Slack Access Notes

- `#social-media-` posting works.
- Slack topic and pin actions failed with `missing_scope`.
- The bot is not a member of `#lux-oasis-advisory-and-services-` / `C0AQWTVJUK1`; `conversations.join` failed with `missing_scope`.
- If that channel should be used as the CEO/business board for this project, a Slack admin needs to invite the bot/agent or grant the needed scope.
