

PriceLabs Mastery Plan

PriceLabs, CRME and ORL learning cadence.

ORL PriceLabs Mastery And Sajida Goals Plan - 2026-07-29

Calendar Actions Created

Weekly PriceLabs / ORL mastery block

- Calendar event: PriceLabs / ORL Revenue Manager Mastery Block
- Starts: Thursday 2026-08-06 10:00-11:00 Asia/Dubai.
- Recurrence: weekly on Thursdays.
- Event ID: 111mgkan3afp954n6alonte5cg
- Purpose: deepen Damiano's PriceLabs knowledge and build Oasis Revenue Lab into a hybrid revenue-management operating layer.

Focus each week:

- PriceLabs goals per listing.
- Report Builder deep dive: templates, custom fields, day-of-week performance, booking-source performance, total occupancy and export options.
- Forecasting deep dive: demand forecast, financial forecast, operational forecast, pace, booking window, pickup and gap-to-goal.
- Revenue-goal reporting: target, actual, pace, gap, required remaining revenue, occupancy/ADR trade-off and owner payout logic.
- PriceLabs data inventory: identify every useful field PriceLabs can provide via UI, reports, Customer API, Report Builder API and MCP/API.
- Report completeness: decide which PriceLabs fields must flow into the owner-ready monthly report, daily command card, ORL dashboard and RevenueState.
- PriceLabs MCP/API and Customer API.
- Hostaway/PMS reconciliation.
- RevenueState quality.

- Recommendation ledger.
- Owner-ready reporting.
- Goal-to-Action Loop.

Sajida / Wellspring revenue goals meeting hold

- Calendar event: Sajida / Wellspring revenue goals for season
- Time: Monday 2026-08-31 11:00-12:00 Asia/Dubai.
- Event ID: f5ogemr6it4p8c391tqccb0ekk
- No external attendee invited because Sajida email was not provided in the request.

Meeting purpose:

- Discuss seasonal revenue goals.
- Define goal per listing.
- Review target vs pace.
- Capture owner expectations.
- Structure a clean data sheet for PriceLabs/ORL AI analysis.
- Use the output to build a better revenue goal and decision loop.
- Prepare material that can later support a video/demo of the Revenue Manager Plus / AI Revenue Desk approach.

Operating Direction

Damiano should build his PriceLabs/revenue-management skill weekly, with ORL as the agent layer behind him.

The human edge:

- goal definition;
- data truth checking;
- commercial judgement;
- owner communication;
- outcome accountability.

The AI/agent edge:

- data pulls;
- pace/gap detection;
- issue ranking;
- action drafting;

- approval cards;
 - owner note drafts;
 - recommendation memory.
-

Next Build Focus

Use the weekly mastery block to build a repeatable **Goal-to-Action Loop** :

- Capture the owner/listing goal.
 - Pull PriceLabs/PMS state.
 - Calculate pace and gap.
 - Diagnose reason.
 - Recommend action.
 - Ask approval where needed.
 - Track outcome.
 - Produce owner explanation.
-

PriceLabs Deep Dive Track

Damiano specifically wants to dive deeper into PriceLabs so his revenue-management reports become as complete as possible and use as much useful PriceLabs data as the product can provide.

Priority order:

- Report Builder: understand every relevant template, field and export that can support owner reports.
- Forecasting: understand how PriceLabs supports demand, pace, booking-window and future-performance thinking.
- Goals: connect listing-level revenue goals to pace, gap and required remaining revenue.
- Data extraction: map which information comes from PriceLabs UI, Report Builder, Customer API, Report Builder API and MCP/API.
- Owner report design: turn the data into a complete monthly report with target vs actual, explanation, actions taken and next strategy.
- ORL integration: make the same PriceLabs data feed RevenueState, daily command cards, AI recommendations and the recommendation ledger.
