

Conviva Marketing And Demo Prep

Demo and positioning notes for Conviva.

Conviva Marketing And Demo Prep - 2026-07-31

Current State Correction

Damiano corrected the Conviva next-step state:

- Murjan 2 / Murjan 3 testing is already in motion.
 - Hostaway is connected / data fetching is no longer the main blocker.
 - The remaining product work before stronger marketing is dashboard add/edit capability and final dashboard polish.
 - Marketing preparation should start now, but final public video should wait until the dashboard flow is stable enough to show cleanly.
-

Product Work Before Public Demo

Owner: Zuhair

- Add / edit property information
- Add missing property information from dashboard.
- Edit existing property fields without developer help.
- Preserve clean field structure instead of dumping everything into one notes slot.
- Extra property information slot
- Separate extra property notes from core mandatory fields.
- Use this for unusual building/unit details, special guest instructions, and operator-specific notes.
- Location classification
- Add City.
- Add Location.
- Add Area.

- Use examples: Dubai, JBR, Dubai Marina, Downtown, Palm Jumeirah, The Greens.
 - Dashboard polish
 - Clear property list.
 - Clear reservation details.
 - Clear guest conversation state.
 - Clear intervention / escalation visibility.
 - No embarrassing broken flow before recording.
-

Video Assets To Prepare

Prepare scripts and checklist now. Record final versions only after the dashboard flow is clean.

- Full dashboard tutorial
- Login.
- Dashboard overview.
- Reservations.
- Guest conversations.
- Status / alerts / intervention flags.
- Structured property information.
- Add/edit property data.
- Escalation and correction flow.
- Product demo video
- 2-4 minute operator-facing walkthrough.
- Show the problem: repetitive WhatsApp guest questions.
- Show Conviva answering from property-specific knowledge.
- Show escalation instead of guessing.
- Show dashboard visibility.
- Close with controlled pilot offer.
- Internal support video
- For Damiano / Lin / Conviva operator.
- Daily checks.
- What to fix when data is missing.
- How to log knowledge gaps.
- When to escalate to human.

- Short teaser
 - 30-60 seconds.
 - Use for WhatsApp/LinkedIn after the full demo is reliable.
 - Keep it practical, not hype-driven.
-

Marketing Assets To Prepare

- One-page offer
- Conviva for Dubai short-term rental operators.
- WhatsApp-native guest operations.
- Per-unit knowledge base.
- Escalation for risky / unknown issues.
- Controlled pilot on 1-5 units.
- Pricing: Core AED 90/unit/month; Intelligence AED 140/unit/month.
- Demo script
- 15-minute sales demo.
- Murjan 3 as live production pilot/demo unit.
- Murjan 2 as sandbox/test unit if needed.
- Website / landing page copy
- Lead with guest-message overload and repetitive WhatsApp replies.
- Do not lead with broad ecosystem language.
- Do not overpromise full automation.
- Prospect tracker
- First 10 Dubai STR operators.
- Unit count.
- Guest-message pain.
- PMS.
- Decision maker.
- Next action.
- FAQ / objections
- "We already use WhatsApp manually."
- "AI might answer wrong."
- "We need PMS integration."

- "Is this fully automated?"
 - "What does it cost?"
-

Sales Readiness Gate

Do not push broad outreach until:

- Dashboard add/edit works.
 - 4-5 real guest conversations have been scored.
 - Escalation behaviour is clear.
 - Demo flow can be shown without broken screens.
 - Damiano approves the marketing/video message.
-

Immediate Next Actions

- Ask Zuhair for ETA on dashboard add/edit and extra property-info slot.
- Prepare full demo video script.
- Prepare one-page offer.
- Prepare first 10 operator tracker.
- Prepare recording checklist for the dashboard tutorial.
