

Luca / NHNCD Partnership Control Tower

Controlled 7-9 September execution plan, reminders and guardrails.

Luca / NHNCD Partnership Control Tower - 2026-09-06

Source: Damiano's Telegram instruction at 20:26 Dubai plus the two attached PDFs: Italian Luca dossier and English Damiano report/actions, both dated 6 September 2026.

Executive State

This is now an active partnership / technical-review lane, not only a prep note.

Luca / NHNCD is being treated as a trusted external collaborator for a controlled first analysis phase across Oasis Revenue Lab, Nest Match and limited Guest Lab materials. Repository and demo access must stay read-only, tenant-scoped and free of personal credentials, production secrets and unnecessary client or guest data.

The signed NHNCD access request is part of the package, but it does not by itself confirm that access has been accepted, repository coverage is correct, or commercial responsibilities are agreed.

What The PDFs Confirm

- Proposed review window: 7-18 September 2026.
- Dubai meeting target: choose 22 or 23 September.
- Weekly 30-minute call to be agreed.
- Oasis Revenue Lab demo is prepared for Luca review, with tenant isolation reported but still needing retained evidence.
- Luca should create his own BotFather Telegram demo bot and privately supply token/username before activation.
- GitHub invitation to `LC-NHNCD` is reported sent/read-only, but acceptance and repo coverage still need verification.
- Nest Match is presented as a B2B professional opportunity/network platform, not a brokerage.

- Nest Match launch still needs the Shams/media-office reply, DLD/DET, UAE legal, privacy, consent and wording checks. Media-office/licensing clarification email was sent on 7 September 2026.
 - PriceLabs public-policy research is complete, and Damiano sent the specific email to Eriel / PriceLabs on 7 September 2026 covering the hosted AI service, authorised customer APIs, third-party AI processing and authorised client reporting. This is now a reply-watch item, not a draft task.
 - Guest Lab repository access is not required now. Shareable docs should be obtained from Zuhair first, with no guest data or unnecessary credentials.
 - Compensation, responsibilities, equity, bonus or exit structure remain parked until Luca's written initial analysis.
-

Active Work Queue

- Wait for Shams/media-office reply to the sent Nest Match licensing email: relevant activities, Dubai/mainland operation, subscriptions and sponsored visibility are now formally asked but not cleared.
 - Wait for Eriel / PriceLabs to reply to Damiano's 7 September email about the exact hosted AI service, authorised customer APIs, third-party AI processing and client reports.
 - Obtain DLD/DET clarification for Nest Match retained property features and Night Board.
 - Approve Nest Match final commercial scope and wording only after UAE legal review of liability, licensing and privacy provisions.
 - Get Zuhair's existing Guest Lab documentation and forward only shareable materials to Luca.
 - Agree the weekly call and choose 22 or 23 September for the Dubai meeting.
 - Follow up on App Store and Google Play developer applications.
 - Keep collaboration responsibilities and compensation open until Luca's initial analysis is received.
-

Next 3-Day Plan

Visible Telegram reminders are scheduled for 09:35 Dubai on each plan day:

- Monday 7 September: `a8fdf72f-f9e7-4af2-b9fd-d02560dd2426`
- Tuesday 8 September: `3e791842-6d52-4243-b49d-7ea8f89e43a6`
- Wednesday 9 September: `d7b1cc54-9235-439d-8e1d-34d2bebd7101`

Monday 7 September 2026

Agent-owned:

- Shams/media-office email has been sent; monitor for reply and keep paid subscriptions/promoted placement uncleared until written guidance is received.
- PriceLabs email has been sent by Damiano; monitor for Eriel's reply and keep the commercial setup uncleared until PriceLabs confirms terms / approval path in writing.
- Prepare DLD/DET clarification question pack for retained property features, Night Board and non-brokerage positioning.
- Check GitHub invitations for `LC-NHNCD` , verify Read-only scope where source access is available, and list which OS components are clean enough to share.
- Confirm Joey Bronner review reminder runs for Lin at 10:00 Dubai and keep Hostaway/checkout cron health visible.

Damiano needed:

- No action on the Shams/media-office email now; wait for the authority reply.
- No action on PriceLabs now; wait for Eriel's reply.
- Tell me whether Luca should be offered 22 or 23 September first for the Dubai meeting.

Tuesday 8 September 2026

Agent-owned:

- Keep Shams/media-office and PriceLabs on reply watch; do not treat either as clearance until written replies land.
- Turn the DLD/DET question pack into the cleanest authority/counsel route and keep the submission draft ready.
- Ask/prepare the Zuhair Guest Lab documentation request, limited to shareable docs and excluding guest data, credentials and unnecessary repo access.
- Recheck App Store / Google Play developer application status and log blockers.
- Retain Revenue Lab dashboard evidence for isolation, read-only access, tenant scope, data sharing and spending limits.

Damiano needed:

- Confirm whether to proceed with the DLD/DET clarification route once the exact wording is ready.
- Confirm whether I can ask Zuhair for the shareable Guest Lab docs, or send me the docs if he already gave them to you.

Wednesday 9 September 2026

Agent-owned:

- Build the Luca handover pack: Shams/media-office sent-and-waiting status, PriceLabs sent-and-waiting status, GitHub Read status, demo-token status, Guest Lab doc status and Nest Match legal/privacy gaps.
- Finalise the Nest Match alignment checklist: FAQ, Terms, verification badges, contact-consent rules, pricing, VAT, renewals, cancellations, trials, Lifetime limits and landlord-free entitlements.
- Confirm Nest Match domain and brand ownership before it is included in Luca's review; current working domain is `nest-match.com`.
- Set the weekly Luca call frame and track his A/B/C analyses toward 18 September.

Damiano needed:

- Choose final weekly-call slot if Luca proposes options.
- Do not approve final commercial scope, compensation or liability language until Luca's written analysis and UAE legal review are in.

Technical-Agent Queue

- Confirm Luca accepted GitHub invitations, verify Read permissions and identify the OS components to share.
- Activate Luca's Telegram demo only after he privately supplies the BotFather token; verify tenant isolation and spending limits.
- Retain Revenue Lab dashboard isolation, read-only and data-sharing checks.
- Confirm the Nest Match acceptance-record update is deployed and tested across registration methods.
- Align Nest Match FAQ, Terms, verification badges and contact-consent rules.
- Verify privacy claims against actual storage, deletion, analytics and data-sharing behaviour.
- Confirm live pricing, VAT, renewals, cancellations, trials, Lifetime limits and landlord-free entitlements.
- Confirm Nest Match domain and brand ownership before including it in any review; current working domain is `nest-match.com`.

Later / With Luca

- Track Luca's A/B/C analyses toward the proposed 18 September date.
- Agree Revenue Lab cost, load and spending targets for WP1.
- Keep ISO 27001 / SOC 2 as a separate roadmap driven by actual requirements.
- Review demo/repository access and retained materials when the analysis ends.

Guardrails

- No external send, authority submission, repository grant, demo activation, public launch, legal approval or commercial agreement should be treated as complete from these PDFs alone.
- Demo credentials and signed/confidential materials stay controlled. Do not send the Luca dossier to authorities.
- Any external email to Shams, PriceLabs, DLD/DET or Luca is Yellow unless Damiano explicitly asks to send that exact message.
