

Scaling Roadmap

Process · Organigram · Function Chart · Disciplinary Code

Internal operating roadmap

Control Tower saved

Not legal final

North Star

Build Lux Oasis Holiday Homes into a system that can reach AED 50k/month true operating profit while reducing founder dependence.

First Freedom Gate

AED 25k/month Damiano draw only after 3 months of verified draw capacity, 50% business retention and protected cash buffers.

Growth Method

Strong revenue-share units first, hybrid structures second, selective sublease only when cash risk is justified.

People Method

Use proof-gated BD/acquisition partners first. Fixed hiring only when portfolio profit and workload justify it.

1. Current Baseline And Target

What the business has now and what it must become.

1 live unit

Current live managed portfolio baseline.

AED 6k

Approximate monthly overhead before new fixed hires.

AED 2,525

Average retained profit per current-style unit before partner share.

AED 1,894

Average unit contribution after 25% source-plus-ops share.

AED 50k

True operating-profit target.

Q2 2027

Base-case first responsible resignation window.

Operating principle

- Unit count matters only if units are profitable, manageable and cash-safe.
- JBR, Palm and proven Marina buildings stay the first operating focus.
- Partner economics must stay tied to Lux Oasis retained net profit, not full property profit.
- The company must build process before adding too many units.

2. Scaling Stages

Grow by proof, then controlled scale, then partner network.

Stage 1 · 1-5 Units

Prove acquisition, launch, cleaning, guest operations, owner reporting and task handoff.

Stage 2 · 5-10 Units

Controlled growth. Junior ops or partner support only if profit covers it with buffer.

Stage 3 · 10-20 Units

Split acquisition, operations, guest experience and reporting into clear functions.

Stage 4 · 20+ Units

Partner Operator Network. Trained cluster operators under Lux Oasis standards.

Stage 5 · Licence / Franchise-Like Model

Only after proof, legal review and repeatable systems. Do not sell formal franchise now.

Stage gate rule

- Before each stage-up, check profit, cash buffer, founder workload, guest quality and owner satisfaction.
- If operations become messy, slow acquisition until SOPs and people catch up.
- The Partner Operator Network comes before any franchise-style public promise.

3. Acquisition And Onboarding Process

How a lead becomes a live, controlled unit.

Acquisition sources

- Warm network and LinkedIn.
- Property Finder, Bayut and Dubizzle forwarded listings.
- Owner SEO page, Google Ads and Meta funnel after approval.
- Agent referral relationships.
- BD partners such as Syed after proof.
- Existing owner, guest and operator-network referrals.

Lead scoring

- Location fit, unit appeal, expected retained profit, setup cost and payback.
- Cash risk, rent/cheque exposure, DTCM/building constraints and operational complexity.
- Owner fit, responsiveness and strategic value for JBR/Palm/Marina proof.

Onboarding phases

- Commercial approval: economics, risk and structure.
- Documents: owner authority, unit details, DTCM/building requirements.
- Readiness: furnishing, Wi-Fi, inventory, access, maintenance, cleaning standards.
- Launch: listing copy, photography, pricing, calendar, guest templates and cleaning calendar.
- First 30 days: booking pickup, guest risk, owner questions, pricing and missing setup items.

4. Organigram

Current, near-term and scale structure.

Interpretation

Damiano should stay CEO. The operating system should absorb decomposition, tracking, first drafts, SOPs and routine follow-up. Human roles are added only where they remove real bottlenecks.

5. Function Chart

Who owns what as the business scales.

CEO / Damiano

Strategy, high-risk approvals, contracts, key owner relationships, major hiring, pricing philosophy.

COO Agent

Control Tower, trackers, drafts, scorecards, approval-ready recommendations, weekly resignation scorecard.

Acquisition / BD

Owner/agent routes, pipeline, first qualification, documents, viewings and handover support.

Operations

Unit readiness, cleaning, maintenance, inspections, vendor QA and issue escalation.

Guest Experience

Airbnb/OTA messages, pre-check-in, WhatsApp where approved, review-risk escalation.

Revenue Management

PriceLabs, ORL, booking pace, floor/target checks, monthly reports and recommendations.

Admin / VA

Sheets, documents, confirmations, recurring task follow-up, content drafts and blocker reporting.

6. Syed / Business Development Figure

Explicit role inside the scaling roadmap.

Role Position

Syed or a similar BD figure is included as a proof-gated Business Development / Acquisition Partner first, not as a guaranteed fixed employee.

Purpose

- Bring owner, landlord, agent and investor routes.
- Help source revenue-share or approved hybrid units.
- Move deals from conversation to viewing, economics, documents and signature.
- Support onboarding and operations only if clearly assigned.
- Reduce Damiano workload rather than creating more follow-up.

60-day proof gate

- Target 5-10 real owner/agent routes.
- Target 1-2 serious unit opportunities.
- Weekly pipeline report.
- No automatic visa/support before proof where legally possible.
- Step up economics only when contribution is real.

7. Partner Economics And Hiring

Keep upside attractive but cash-safe.

20%

Acquisition-only from units personally sourced/helped closed.

25%

Source, close, onboard and actively operate.

Up to 30%

Only for proven A-to-Z operator after proof.

Rules

- Always calculated on Lux Oasis retained net profit, not full property profit.
- Paid only after revenue is collected and owner/direct costs are settled.
- Unit-specific, not company-wide.
- No passive forever commission.
- Operations share exists only while active operations are performed.

Hiring gates

- First hire should be BD plus operations, not pure admin.
- Hire only when the role removes a real bottleneck.
- Portfolio profit must cover all-in cost with buffer.
- Visa planning range: AED 8k-10k normal, AED 12k stressed.
- Sponsor one serious person first only after proof.

8. Disciplinary Code

Internal operating standard, not legal-final HR policy.

Level 1 · Coaching

First minor process mistakes, unclear reporting or small admin errors.

Level 2 · Written Warning

Repeated minor mistakes, missed deadlines, missing photos or incomplete handover.

Level 3 · Final Warning

Guest/owner risk, failure to escalate, serious operational miss or risky unauthorised communication.

Level 4 · Removal

Dishonesty, data breach, theft/fraud, non-circumvention, unauthorised money/pricing/refund/contract action.

Immediate escalation

- Guest cannot access property.
- Safety issue, property damage, bad review threat or owner complaint.
- Cleaner no-show near check-in.
- DTCM/building/security issue.
- Payment, refund, pricing, contract or data/privacy risk.

Incident process

- Record what happened, source evidence, risk level and corrective action.
- Protect guest and owner first.
- Update Control Tower if material.
- Add SOP correction if the process caused the issue.

9. 30/90-Day Execution Roadmap

What happens next.

Next 30 days

- Review Syed 60-day trial contract.
- Keep JBR / property #2 acquisition live.
- Prepare owner landing page and ad pack for approval.
- Create unit-scoring template.
- Create cleaning/readiness SOP v1.
- Create owner onboarding checklist v1.

90 days

- Month 1: property #2 path, partner trial, owner funnel, SOP base.
- Month 2: 1-2 serious unit opportunities, onboarding/reporting rhythm, junior ops need check.
- Month 3: aim for 3-4/month acquisition velocity or reforecast honestly, decide partner/hire step-up, update AED 50k path.

Weekly scorecard

- Live units, signed-not-launched units, qualified leads, partner pipeline, units added this month.
- Retained profit/unit, trailing 3-month profit, 50% draw capacity, cash buffer and founder workload risk.
- Gap to AED 50k/month operating profit.
